

INSIGHT INTO FINAL DATA

After completing process of wrangling I merged the tables to form a final data, the below mentioned questions arise while analysing the final data.

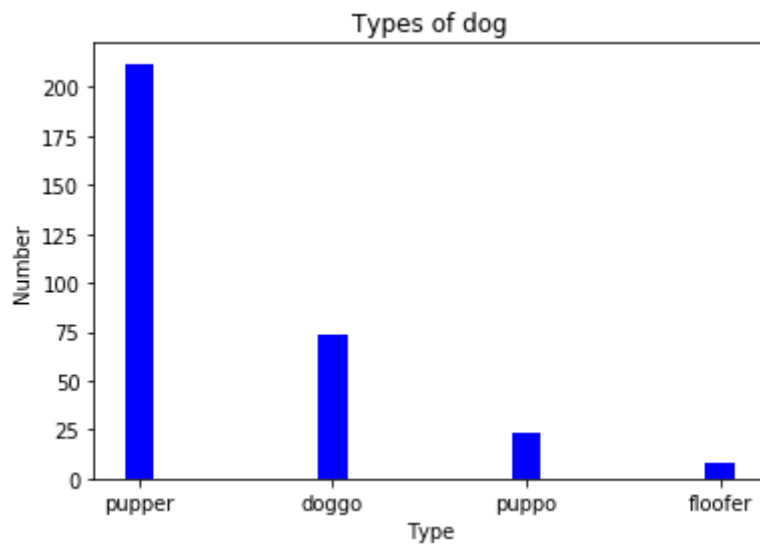

Q1. Which type of dog is maximum in number?

Q2. Which breed is the most common?

Q3. Did the page gain popularity with time?

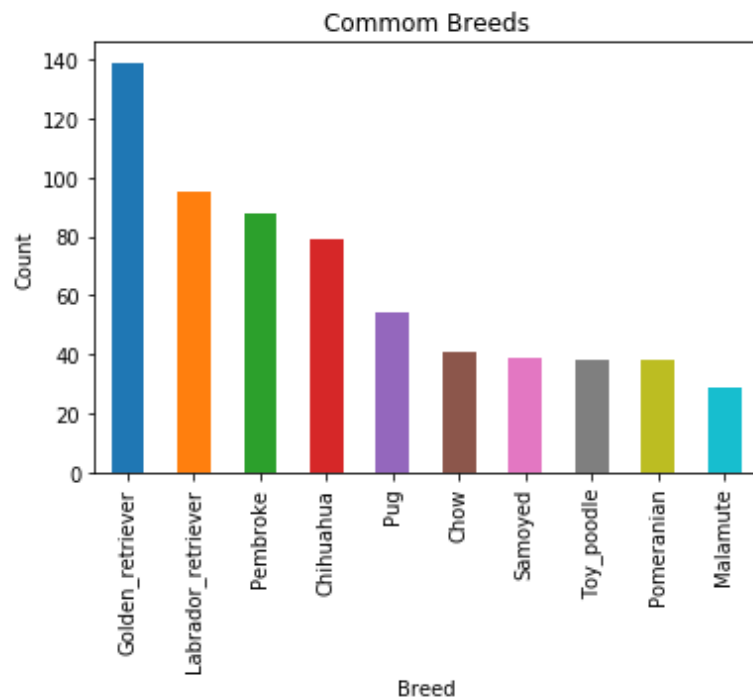

Q4. Which dog type have more number of favourite counts?

Sol. 1.

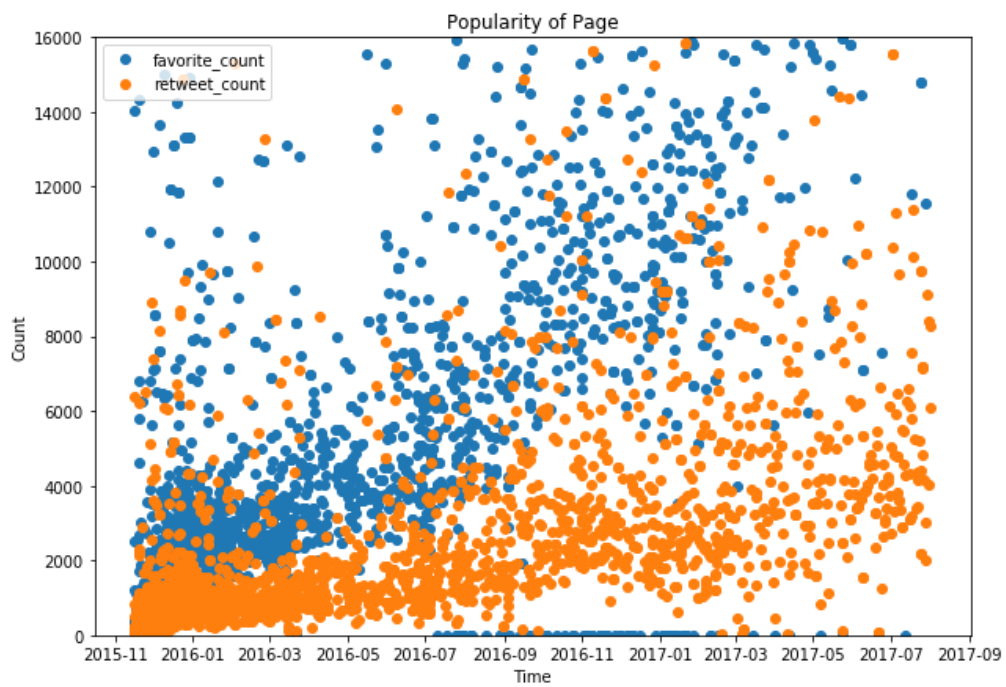

Pupper is maximum in number.

Sol. 2.

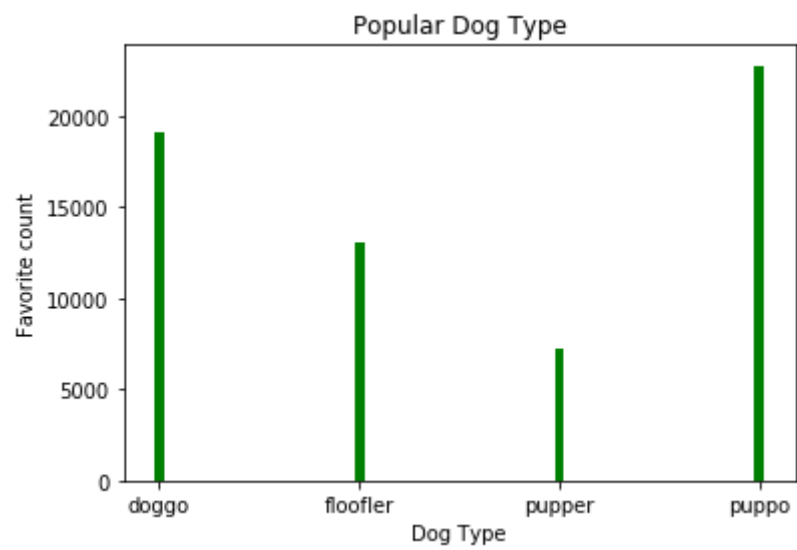

Golden_retriever is the most common breed.

Sol.3.

Yes, the page gain popularity with time as the number retweets and number of favourites increased with time.

Sol. 4.

For this I calculated the mean of favourite_count of each dog type and it is found that puppo gets the max favourite counts.
